Khouribga, Morocco

professional bachelor degree in mathematics

2019

ENS FES

FES, Morocco

IT Solutions Designer and Developer

2024

1337 Coding School

Khouribga, Morocco

PROJECTS

ft_transcendence

This project is about creating a website for the mighty Pong contest!

i have developed a remote 3D pong game using ThreeJS, and Django Rest Framework for the back-end.

swifty-companion

The aim of the project is to build a mobile application that will retrieve the information of 42 students, using the 42 API.

Wordpress mobile apps

Specialize in developing native mobile applications with WordPress REST API integration, delivering seamless mobile experiences while preserving existing website infrastructure.

Classic Game Development

Developed classic browser games (Tetris, Minesweeper, Snake) using HTML, CSS, and JavaScript, with authentic gameplay mechanics and responsive user interfaces.
